### **Kigen's Commitment to Compliance with Export Controls and Sanctions**

As a UK headquartered company doing business globally, Kigen (UK) Limited has over four years of experience in developing and delivering eSIM and iSIM solutions and secure enablement technologies for remote subscription management into cellular IoT industries. Kigen's products include operating systems for SIM cards, and SaaS technology to allow remote provisioning, updating and management of SIMs throughout the connected device value chain.

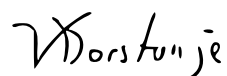

With such a trusted and sophisticated portfolio of IP, software and services delivered to customers globally, it is Kigen's policy to operate in strict compliance with all applicable export controls, sanctions, laws and regulations, applicable customs requirements, and related reporting requirements.

Kigen has established a governance framework that encompasses the policies, processes, and internal controls necessary to implement, facilitate, and maintain a robust trade compliance program throughout the company the ecosystem of valued customers and partners.

All employees, contractors, partners, customers and other entities doing business with Kigen must adhere to the applicable export and customs laws and regulations when receiving and using Kigen products and services. Failure to comply is a serious offence and could result in civil or criminal charges and penalties, as well as significant reputational harm and loss of export privileges.

As a global company, Kigen is committed to a robust export, sanctions and customs compliance program. More information can be found on [www.kigen.com](http://www.kigen.com) at <https://kigen.com/company/policies/terms-and-conditions/#h-export>.

Sincerely,

Vincent Korstanje  
Chief Executive Officer
